American Literature in Context Feb 26 2023 First published between 1982 and 1983, this series examines the peculiarly American cultural context out of which the nation's literature has developed. Covering the years from 1865 to 1900, this third volume of American Literature in Context focuses on the struggles of American writers to make sense of their rapidly changing world. critical sociologist (Thorstein Veblen). Particular attention is paid to the challenge to conventional literary and cultural values represented by writers such as William Dean Howell who pursued a new form of scientific, democratic realism in American writing. This book will be of interest to those studying American literature and American studies.

American Horizons Feb 14 2022 U.S. history is increasingly perceived, interpreted, and taught as part of a global historical experience. The mutual influence of change - of global forces entering the United States and of American ideas, goods, and people moving out through the world - has been a consistent feature since the 16th century. Although most Americans today are aware that their influence is felt abroad and are increasingly aware of the influence of events abroad on their own lives, they tend to think of these as recent developments. In fact, those earliest exchanges of beliefs and products some 500 years ago established a pattern of interaction that continues today. *American Horizons* tells the story of the United States by exploring this exchange on a global scale and placing it at the center of that story. By doing so, the authors provide a different perspective on the history of the United States, one that they hope broadens the horizons of those who read their work and are ever mindful of the global forces that increasingly and profoundly shape their lives. At the same time, *American Horizons* considers those ways in which U.S. influence reshaped their lives and experiences of people of other nations. *American Horizons* presents an opportunity to view the nation's history as more than a mere sequence of events for students to memorize. Although adhering to the familiar chronological organization of the U.S. History course, their narrative style and structure provide the flexibility of shifting emphasis from time to time to the global aspects of American history. Although the story of the United States is always at the center, that story is told through the movement of people, goods, and ideas into, within, or out of the United States.

The Origins of African American Literature, 1680-1865 Jul 27 2020 From the earliest texts of the colonial period to works contemporary with Emancipation, African American literature has been a dialogue across color lines, and a medium through which black writers have been able to exert considerable authority on both sides of that racial demarcation. Dickson D. Bruce argues that contrary to prevailing perceptions of African American voices as silenced and excluded from American history, those voices were loud and clear. Within the context of the wider culture, these writers offered powerful, widely read, and widely appreciated commentaries on American ideals and ambitions. The Origins of African American Literature provides strong evidence to demonstrate just how much writers engaged in a surprising number of dialogues with society as a whole. Along with an

extensive discussion of major authors and texts, including Phillis Wheatley's poetry, Frederick Douglass's Narrative, Harriet Jacobs' Incidents in the Life of a Slave Girl, and Martin Delany's Blake, Bruce explores less-prominent works and writers as well, thereby grounding African American writing in its changing historical settings. The Origins of African American Literature is an invaluable revelation of the emergence and sources of the specifically African American literary tradition and the forces that helped shape it.

Empire and Slavery in American Literature, 1820-1865 Aug 28 2020 The flourishing of pre-Civil War literature known as the American Renaissance occurred in a volatile context of national expansion and sectional strife. Canonical writers such as Herman Melville, Walt Whitman, Emily Dickinson,

and Henry David Thoreau, as well as those more recently acclaimed, such as Frederick Douglass and Harriet Beecher Stowe, emerged amidst literature devoted to questions of nationalism, exploration, empire, the frontier, and slavery. This outpouring included some of the most important early works in African American, American Indian, and Chicana/Chicano literature. *Empire and Slavery in American Literature, 1820-1865* tells the story of this exceptionally vibrant and wide-ranging multicultural "renaissance" of our national literature. Scores of diaries, reports, and memoirs, in addition to a diverse imaginative literature, documented the nation's expansion to its modern continental borders, along with exploration of territory far beyond. Driven by belief in the "manifest destiny" of Americans to bring liberty to new lands, narratives of empire ranged from the heroic to the fantastic, and they spawned a popular frontier literature that created some of the most enduring myths of America. At the same time, expansion provoked a corresponding literature of dispossession by American Indians and Mexicans that combined protest with statements of pride and independence. Accompanying expansion was the contentious and ultimately tragic debate over slavery carried out in a voluminous proslavery and antislavery literature that took the form of speeches, pamphlets, autobiography, poetry, and fiction. By juxtaposing the literature of slavery with the literatures of exploration and the frontier, *Empire and Slavery* traces the formative features of the national image of the United States.

Town and Country Oct 10 2021 A thoroughly researched and extensively documented look at race relations in Arkansas during the forty years after the Civil War, *Town and Country* focuses on the gradual adjustment of black and white Arkansans to the new status of the freedman, in both society and law, after generations of practicing the racial etiquette of slavery. John Graves examines the influences of the established agrarian culture on the developing racial practices of the urban centers, where many blacks living in the towns were able to gain prominence as doctors, lawyers, successful entrepreneurs, and political leaders. Despite the tension, conflict, and disputes within and between the voice of the government and the voice of the people in an arduous journey toward compromise, Arkansas was one of the most progressive states during Reconstruction in desegregating its people. *Town and Country* makes a significant contribution to the history of the postwar South and its complex engagement with the race issue.
