[Targeting Uplift](#) Dec 25 2020 This book explores all relevant aspects of net scoring, also known as uplift modeling: a data mining approach used to analyze and predict the effects of a given treatment on a desired target variable for an individual observation. After discussing modern net score modeling methods, data preparation, and the assessment of uplift models, the book investigates software implementations and real-world scenarios. Focusing on the application of theoretical results and on practical issues of uplift modeling, it also includes a dedicated chapter on software solutions in SAS, R, Spectrum Miner, and KNIME, which compares the respective tools. This book also presents the applications of net scoring in various contexts, e.g. medical treatment, with a special emphasis on direct marketing and corresponding business cases. The target audience primarily includes data scientists, especially researchers and practitioners in predictive modeling and scoring, mainly, but not exclusively, in the marketing context.

**Power Score** Sep 14 2022 ghSMART, the bestselling team behind Who: The A Method for Hiring, returns with a breakthrough formula for how the best leaders and teams deliver results. "ghSMART is the world's top firm for helping leaders hire talented teams and run them at full power. Nothing is more important."—Marshall Goldsmith, bestselling author of Mojo and What Got You Here Won't Get You There "The most useful book about leadership." That is what we hope you and your team will say after finishing Power Score. Is your team running at full power? Only 10 percent of leaders run their teams at full power. The formula you are about to learn is based on the most extensive research of its kind, spanning more than 15,000 careers with over 9 million data points. The idea has been battle-tested for more than two decades by leaders in every major industry. It works. Successful leadership starts with three key questions: 1. Priorities—Do we have the right priorities? (Only 24 percent of leaders do.) 2. Who—Do we have the right people on the team? (Only 14 percent of leaders do.) 3. Relationships—Do we have the right relationships that deliver results? (Only 47 percent of leaders do.) Learn how to calculate your team's Power Score, and how to improve each of the three key areas of leadership. Learn what to do, and what not to do, from compelling statistics and inspiring stories of those leaders who have succeeded and those who have failed. You may be surprised how easy it is to read this little book. And you may be even more surprised by how fast this approach will boost your team's results. When you dial up your team's Power Score, you will make a greater impact as a leader, help your team earn more money for your cause (whatever your cause may be), and enjoy greater career success. Praise for Power Score "Shaking distrust out of an organization is hard. But the payoff is immense. Bravo to Smart, Street and Foster for sharing their ideas about how to make that happen."—Forbes "[Power Score] offers insights on improving in each dimension and inspiration. It's written briskly, in a question-and-answer format that keeps ideas clear and concise. The book's a winner and maybe you will be too if you try its approach."—The Globe and Mail "The power score is the secret sauce that gives the group the information needed to fix problems. The authors provide plenty of guidance presented in an accessible Q&A format."—Success "I wouldn't be surprised if Power Score became the new go-to guide for leadership. Effective teams are key in everything from healthcare to business to government to nonprofits, and this book will help organizations change the conversation about getting results."—Atul Gawande, New York Times bestselling author of Being Mortal and The Checklist Manifesto "Smart, Street, and Foster have turned more than twenty years of research on leadership into a practical, systematic approach for getting results."—Frederick W. Smith, chairman and chief executive officer of FedEx Corporation "My entire team applied the principles of Power Score and has enjoyed explosive growth as a result. Even better, I am having more fun as a leader than ever before."—Jeff Booth, chief executive officer and founder of BuildDirect

[Settling Scores](#) Jun 18 2020 Classical music was central to German national identity in the early twentieth century. The preeminence of composers such as Bach and Beethoven and artists such as conductor Wilhelm Furtwangler and pianist Walter Gieseking was cited by the Nazis as justification for German expansionism and as

evidence of Aryan superiority. In the minds of many Americans, further German aggression could be prevented only if the population's faith in its moral and cultural superiority was shattered. In *Settling Scores*, David Monod examines the attempted "denazification" of the German music world by the Music Control Branch of the Information Control Division of Military Government. The occupying American forces barred from the stage and concert hall all former Nazi Party members and even anyone deemed to display an "authoritarian personality." They also imported European and American music. These actions, however, divided American officials and outraged German audiences and performers. Nonetheless, the long-term effects were greater than has been previously recognized, as German government officials regained local control and voluntarily limited their involvement in artistic life while promoting "new" (anti-Nazi) music.

*Unsettled Scores* Mar 08 2022 The Hollywood careers of Aaron Copland and Hanns Eisler brought the composers and their high art sensibility into direct conflict with the premier producer of America's potent mass culture. Drawn by Hollywood's potential to reach—and edify—the public, Copland and Eisler expertly wove sophisticated musical ideas into Hollywood and, each in their own distinctive way, left an indelible mark on movie history. Sally Bick's dual study of Copland and Eisler pairs interpretations of their writings on film composing with a close examination of their first Hollywood projects: Copland's music for *Of Mice and Men* and Eisler's score for *Hangmen Also Die!* Bick illuminates the different ways the composers treated a film score as means of expressing their political ideas on society, capitalism, and the human condition. She also delves into Copland's and Eisler's often conflicted attempts to adapt their music to fit Hollywood's commercial demands, an enterprise that took place even as they wrote hostile critiques of the film industry.

**Stability of Edwards Personal Preference Schedule Need Scale Scores and Profiles Over a Seven-week Interval** Oct 15 2022 Seven-week test-retest correlations were obtained for need scale scores and individual need profiles for a sample of pre-flight students. The coefficients for need scales were in the 50's and 60's (2 of 15 were below .50). Mean scores on 7 of the need scales changed significantly over the seven-week intertest interval. Of the 74 individual profile correlations, 64 were significant; the median value was .75. There was some evidence that low profile stability was related to a low consistency score on one or both administrations. The test-retest data were compared with other reliability studies of the Personal Preference Schedule. (Author).

*The Associations Between the Scores on the ACT Test and Tennessee's Value-Added Assessment in 281 Tennessee High Schools* Jul 12 2022 The purpose of this study was to explore the relationships between and among various demographic and test score data with American College Testing (ACT) scores in 281 Tennessee high schools. This study also addressed which high school characteristics were related to the number of students meeting the ACT requirement for Tennessee lottery scholarships. In addition, this study examined Tennessee Value Added Assessment System's (TVAAS) assessment of ACT scores and its distribution of grades to Tennessee's high schools based upon its Value-Added analysis. The researcher performed correlations and multivariable linear regressions using socioeconomic status, ethnicity, dropout rate, graduation rate, attendance, average daily membership, per-pupil expenditure, teacher salary, Gateway exams, English I scores, and math foundations scores as independent variables and ACT scores as the dependent variable. The strengths of the correlations were examined and the best combination of independent variables was used to predict future ACT scores. Schools were divided into quartiles, based upon average daily membership and attendance rates, in order to analyze the differences in r<sup>2</sup> values among the quartiles when running regressions to predict ACT scores. Quartiles, based upon the percentage of students qualifying for free/reduced meals, ethnicity, and average daily membership were used to study the difference in TVAAS's grade distribution based upon its assessment of ACT scores. The findings indicated that English I and II scores are most strongly associated with ACT composite scores including the four ACT subtests: math, English, reading, and science. English scores were found to be more strongly associated with ACT math scores than Algebra I scores and more strongly associated with ACT science scores than biology scores. It was found that the 21 composite ACT score requirements of Tennessee's lottery scholarships predominantly favored Caucasian students who did not qualify for free.

**Scores** Mar 28 2021 A gay man who created New York's most notorious den of homosexuality . . . an anxious, anything-but-hardboiled lawyer who became one of the most successful undercover mob informants in history. . . . In this hilarious and fascinating account, Michael Blutrigh takes you inside star-studded 1990s New York, mafia sit-downs, and the witness protection program. Meet Michael D. Blutrigh, founder of Scores, the hottest strip club in New York history. A resourceful lawyer at one of the city's most respected firms, Blutrigh fell into the skin trade almost by accident, but it was his legal savvy that made Scores the first club in Manhattan to feature lap dances and enabled him to neatly sidestep a law requiring dancers to wear pasties by instead covering their nipples with latex paint. Soon Scores, the club Howard Stern called "like being in a candy shop," was a home away from home for everyone from sports superstars and Oscar-winning actors to pop singers and political notables alike. The catch? The club was smack dab in John Gotti's territory, and the mafia wanted a piece of the action. The Gambino family doesn't take no for an answer . . . and neither, as it turns out, does the FBI. In his memoir, Blutrigh recounts in detail how his beloved club became a hub for the mafia, and how he found himself caught up in an FBI investigation, sorely struggling to juggle roles of business owner and undercover spy. As his life spiraled out of control, Blutrigh would face the loss of almost everything dear to him. But whether marching a line of topless strippers as human exhibits into a trial to save the club's liquor license or wearing wires to meetings with armed gangsters, he never lost his sense of humor or his nerve. In Scores, Blutrigh finally tells all—from triumph to betrayal—in his own funny, self-deprecating voice.

**Higher Credit Scores Now** Feb 24 2021 HIGHER IS BETTER! Credit scores are the most misunderstood pricing tools used by the lending industry to increase the interest rate and fees on your loans and credit cards. Increase your scores, reduce your fees. It's that simple... but it can be very tricky, and a simple, well intended goof, can return very dire, long term (many years) penalties. It's not rocket science and it doesn't have to cost you an arm and a leg... but it is counter-intuitive and what may seem like a common sense "tweak" often ends up damaging your scores for years. Hey, this is a "high stakes table"! Improving your scores will reduce interest rates and fees on

the most important loans in your life. It's pretty easy to do, but very tricky. Do it wrong and it could cost you a fortune and take years to correct! Read this and DO IT RIGHT the first time.

Making the Grades Sep 02 2021 In this alternately amusing and appalling exposé of the standardized test industry, fifteen-year veteran Todd Farley describes statisticians who make decisions about students without even looking at their test answers; state education officials willing to change the way tests are scored whenever they don't like the results; and massive, multi-national, for-profit testing companies who regularly opt for expediency and profit over the altruistic educational goals of teaching and learning. Although there are absurd moments--as when Farley and coworkers had to grade students based on how they described the taste of their favorite food-- the enormous importance of standardized tests in the post "No Child Left Behind" era make this no laughing matter. "This book is dynamite! The nice personal voice makes it utterly accessible and enticing, wholly apart from the terribly important ammunition it provides to those of us in the 'testing wars' at national and local levels."—Jonathan Kozol, author of *Savage Inequities*

*Symphonies nos. 3 and 4 in full score* Apr 28 2021 These revolutionary works brought a strikingly organic almost architectural unity to the symphony that music historians recognized as far in advance of anything in the classical masters. Planted with seeds of change already evident in the beautiful, dark third symphony, the fourth symphony presented the most individual work in this form that the 20th century had yet witnessed. Harmonically new, boldly innovative, and structured on a subtle continuity of line, this was a kind of music previously unheard in the concert hall. Austere and intensely concentrated, Sibelius's symphonies of 1907 and 1911 are frequently performed around the world by major orchestras. "It is hard to think of any music in which the composer is more spontaneous and masterful, and uncompromising in his thought." Olin Downes, "Thompson's International Encyclopedia."
