This comprehensive guide to Wyoming includes all of the expected attractions as well as many more far-flung and offbeat adventures, extensive outdoor recommendations and details on the cultural opportunities that abound. Wyoming is arguably the most "western" western state. From the windblown plains of Casper to the mountain peaks of the Wind River Range, Alli Rainey, a passionate Wyoming resident and rock climber, will help you find the best the state has to offer. Come explore the unspoiled West. E. D. Cope and O. C. Marsh were 19th-century paleontologists whose friendship couldn't withstand their professional rivalry. Their competitive natures led to the frenzied unearthing of hundreds of dinosaur fossils across North America, many of which can still be seen in museums around the world. The captivating tale of these scientists unfolds in this absorbing book, which also includes a timeline,

sidebars, and fact boxes offering much information about paleontology, dinosaurs, and excavations as well as photographs and images to further elucidate essential science concepts. Countless fossilized remains of dinosaurs are buried throughout the U.S. and Canada--and plenty of places invite you to act like an archaeologist and search for them. Sift through the pages of "Dinosaur Digs" for information on joining a dinosaur dig and touring fossil sites, background information and expert insight on paleontological science and speculation, excavation techniques, and more. More than 250 full-color images, including specially commissioned maps and evocative illustrations are included. Information on museum activities around the world. Profiles family-friendly places to visit in each state, with information on location, age range, best time to visit, and price for each. With this informative, fully updated and revised guide, you can explore the mineral-rich region of Montana. It describes the state's best rockhounding sites and covers popular and commercial sites as well as numerous little-known areas. This handy guide also describes how to collect specimens, includes maps and directions to each site, and lists rockhound clubs around the state. This is truly a complete guide to popular collecting sites in Montana and source-book brimming with advice that can be of use to both the novice and the experienced rockhounder. Michael Evans is in Montana on a dinosaur dig with his paleontologist father, but he certainly never expected to find a live Tyrannosaurus Rex plucked out of its own time and looking for dinner, nor encounter a girl with some very advanced technology trying to trap the beast. A group of children hunt dinosaurs through grass, a jungle, and mud. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids. The collection reveals how scholars of the 1970s through the 1990s argued the importance of previously unconsidered questions about the shape of medieval familial experience, and how their mutual information and criticism has refined and added to this investigation in the intervening period. What seems to Mike Evans like a boring dinosaur dig in China turns suddenly dangerous when he finds evidence of a live dinosaur in the neighborhood--and he and his friend Shannon run into a villain in a skull mask called Mr. Bones who is controlling both a feathered dino, and a fierce carnivore. In the Badlands of Montana, many stories are waiting to be told - about Triceratops and Ankylosaurus and ancient crocodiles. There, scientists search for the bones of animals that lived millions of years ago. In Dinosaur Dig, Kathryn Lasky and Christopher G. Knight, the award-winning writer-and-photographer team, describe the dirty, sweaty, and exciting job they and five other families perform as they search for fossils in the Badlands. Dinosaur Dig is a feast of keen observation, magnificent photography, and information about Earth's ancient past. Like any good story, it captures expectations and disappointments, close calls, and finally success as the diggers uncover and race to preserve the bones of a creature that died 67 million years ago. In this exciting sequel to Dinosaur Hideout, twelve-year-old Daniel Bringham travels back millions of years to the time of dinosaurs - a terrifying journey from which he may never return. In Dinosaur Hideout, Daniel and Pederson, a reclusive palaeontologist living on a neighbouring farm in southwestern Saskatchewan, made a brilliant discovery - the fossil remains of a dinosaur called an Edmontosaurus. Now, local bullies Todd and Craig Nelwin, jealous of all the attention Daniel gets, want to find his hideout and wreck it. When the three scuffle and Daniel hits his head on the rocks, he is whisked out of his own time and into the world of the dinosaurs - Triceratops, Brontosaurus, Tyrannosaurus Rex; a world of giant redwoods, huge ferns, and dragonflies nearly a metre wide. When another equally strange shock brings him back to his own time, Daniel at first doesn't realize that he carries a small piece of the past - a bit of redwood bark. Whenever he touches it, he will return to the dinosaurs' world. Daniel makes two

more unplanned but thrilling trips to the past. He sees the most marvellous, and horrifying, sights and makes new discoveries about dinosaurs. On the final trip, Daniel has two unwilling "hitchhikers" with him - the Nelwins. Daniel isn't the only one who learns from their sudden shared adventure. A glossary of names and technical terms and a book list kids can use to expand their knowledge of dinosaurs is included. Following the adventures of Dinosaur Hideout and Dinosaur Breakout, twelve-year-old Daniel Bringham once again travels back to the time of dinosaurs to learn more about the prehistoric creatures he loves. This time he has an unexpected companion. In Dinosaur Hideout, Daniel and his neighbour, Ole Pederson, made a brilliant discovery: the fossil remains of a dinosaur, an Edmontosaurus they called Roxanne. In Dinosaur Breakout, Daniel had an even more amazing adventure. He learned the secret of time travel to the world of dinosaurs: Triceratops, Brontosaurus, Tyrannosaurus Rex. A world of giant redwoods and dragonflies a metre wide. Now, in Dinosaur Stakeout, Daniel decides to travel to the past one more time. He wants to find out if a dying female dinosaur he saw on his last trip is Roxanne, the fossil he and Pederson found in Book One. Daniel figures to go alone, but he's figured without Pederson and his friend Mildred Roost, another palaeontologist. Mildred insists on coming with him and Daniel thinks it'll wreck everything. An old lady will just slow him down, and if she gets killed, he'll blame himself. But he's reckoned without a tough old bird with lots of tricks up her sleeve, tricks that could save both their lives. Dinosaur Stakeout includes a glossary of names and technical terms and a book list kids can use to expand their knowledge of dinosaurs. Fodor's Family Adventures 3rd ed. Wanting to learn more after visiting a dinosaur museum, Brother and Sister journey to the site of a real dinosaur dig and wonder if they will find fossil remnants of a stegosaurus, a tyrannosaurus rex or another exciting species. Original. 75,000 first printing. Two of the most trusted reviewers in the field join with top authors, illustrators, and critics in a definitive guide to choosing books for children—and nurturing their love of reading. A FAMILY OF READERS is the definitive resource for parents interested in enriching the reading lives of their children. It's divided into four sections:

1. Reading to Them: Choosing and sharing board books and picture books with babies and very young children.
2. Reading with Them: Launching the new reader with easy readers and chapter books.
3. Reading on Their Own: Exploring what children read—and how they read—by genre and gender.
4. Leaving Them Alone: Respecting the reading privacy of the young adult.

Roger Sutton knows how and why children read. He must, as the editor in chief of *THE HORN BOOK*, which since 1924 has been America's best source for reviews of books for young readers. But for many parents, selecting books for their children can make them feel lost. Now, in this essential resource, Roger Sutton and Martha V. Parravano, executive editor at the magazine, offer thoughtful essays that consider how books are read to (and then by) young people. They invite such leading authors and artists as Maurice Sendak, Katherine Paterson, Margaret Mahy, and Jon Scieszka, as well as a selection of top critics, to add their voices about the genres they know best. The result is an indispensable readers' companion to everything from wordless board books to the most complex and daring young adult novels. Dragon legends are found in nearly every culture around the globe. They have been thought to be myths. Yet, mysteriously, these dragons sound a lot like the other giant scaled reptiles, dinosaurs. Could they be one and the same? Surprisingly enough, the answer to this question is a powerful truth that confirms biblical authority and demolishes the theory of evolution. This book brings forth many new theories and evidence that are sure to fascinate the reader. Covers a wide range of programs and ideas on library programs for families to promote reading. Find out what it takes to excavate the past by going along on a dinosaur dig. Written by a parent for parents, this opinionated, personal, and easy-to-use guide has hundreds of ideas to keep the kids entertained for an
