Pollution from nuclear power plants can have extremely harmful effects on people, animals, and the environment. But did you know that scientists have made nuclear power much safer? Or that governments have rules to ensure that waste materials are handled correctly? Explore the story behind nuclear pollution. As part of the Searchlight Books™ collection, this series sheds light on an important question—What Can We Do about Pollution? Informative text, compelling photos, and engaging captions will help you find the answer! 1188 sermon suggestions -- One from every chapter in the Bible. Morgan's expositions sparkle as they enhance Bible texts from every chapter in the Bible. Concise and delightfully free of redundancy, these selections reveal the master expositor's keen, analytical insight into God's Word. To encourage preachers and Bible teachers to develop their own sermon and lesson themes creatively, the author mentions that these are sermon suggestions -- not sermons or sermon outlines. He intentionally left the notes untitled, "preferring to let the text of Scripture be their only caption." These penetrating truths, firmly anchored in Scripture, are best described by G. Campbell Morgan himself: On every page of...the "God-breathed Writings" there are many thoughts which stretch out like long, clear arms of light across the darkness, discovering things which otherwise were hidden, and often illuminating wider areas than those of the immediate context. They are searchlights. From the multitude of these, I have selected one in each chapter of the Bible. Perhaps the work will also serve to illustrate a method of showing how focal points of radiating light gather their radiance from the context. "Directory of members, constitution and by-laws of the Society of American military engineers. 1935" inserted in v. 27. Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! Bionics uses mechanical and electronic technology to solve biological problems. How does it help people who have lost limbs walk again? How does it return hearing or vision to the deaf or blind? What crucial organs can it replace inside the body? Learn more about how today's bionics are extending, improving, and saving lives. Deep in the desolate Mojave Desert in Nevada's extreme southern tip lies a small mining town called Searchlight. This meticulously researched book by Searchlight's most distinguished native son recounts the colorful history of the town and the lives of the hardy people who built it and sustained a community in one of the least hospitable environments in the United States. Its story encompasses both Nevada's early twentieth-century mining boom and the phenomenal growth of southern Nevada after World War II. Searchlight is a valuable contribution to the history of Nevada and a lively account of life in the forbidding depths of the Mojave Desert. Published in 1912, this is the adventures of Tom Swift and his great searchlight.
