A radically inclusive, intersectional, and transnational approach to the fight for women's rights. Upper-middle-class white women have long been heralded as "experts" on feminism. They have presided over multinational feminist organizations and written much of what we consider the feminist canon, espousing sexual liberation and satisfaction, LGBTQ inclusion, and racial solidarity, all while branding the language of the movement itself in whiteness and speaking over Black and Brown women in an effort to uphold privilege and perceived cultural superiority. An American Muslim woman, attorney, and political philosopher, Rafia Zakaria champions a reconstruction of feminism in *Against White Feminism*, centering women of color in this transformative overview and counter-manifesto to white feminism's global, long-standing affinity with colonial, patriarchal, and white supremacist ideals. Covering such ground as the legacy of the British feminist imperialist savior complex and "the colonial thesis that all reform comes from the West" to the condescension of the white feminist-led "aid industrial complex" and the conflation of sexual liberation as the "sum total of empowerment," Zakaria follows in the tradition of intersectional feminist forebears Kimberlé Crenshaw, Adrienne Rich, and Audre Lorde. Zakaria ultimately refutes and reimagines the apolitical aspirations of white feminist empowerment in this staggering, radical critique, with Black and Brown feminist thought at the forefront. Grounded in critical race feminism, this book explores mindfulness as an empowering approach in multicultural education. The author explores how learners of multicultural education—by (re)centering the body through mindfulness with concrete strategies and scaffolded practice—can be empowered to handle the activated emotions and deep self-inquiry that come with the work of social justice, liberation, and anti-racism. This book includes counter stories of students of colors and offers both an epistemological and a curricular approach to mindfulness in multicultural education, including discussion of theory and key principles in addition to ten modules with practices to engage learners. These modules can be directly applied as the basis for curricular changes in teacher education and university-wide social justice courses, or they can be independently read by learners interested in enhancing their wellbeing and social justice. Written for teacher preparation and university social justice courses, this book encourages educators to contextualize their mindfulness practice within a critique of systems of oppression and ask questions about how mindfulness can empower action towards a more just society. This book explores storytelling as an innovative means of improving understanding of Indigenous people and their histories and struggles including with the law. It uses the Critical Race Theory ('CRT') tool of 'outsider' or 'counter' storytelling to illuminate the practices that have been used by generations of Aboriginal women to create an outlaw culture and to resist their invisibility to law. Legal scholars are yet to

use storytelling to bring the experiential knowledge of Aboriginal women to the centre of legal scholarship and yet this book demonstrates how this can be done by way of a new methodology that combines elements of CRT with speculative biography. In one chapter, the author tells the imagined story of Eliza Woree who featured prominently in the backdrop to the decision of the Supreme Court of Queensland in *Dempsey v Rigg* (1914) but whose voice was erased from the judgements. This accessible book adds a new and innovative dimension to the use of CRT to examine the nexus between race and settler colonialism. It speaks to those interested in Indigenous peoples and the law, Indigenous studies, Indigenous policy, Aboriginal and Torres Strait Islander history, feminist studies, race and the law, and cultural studies. This book brings together 14 anti-racist feminists who examine ways in which race and gender interact to shape the lives of women of colour in Canada. This collection of articles covers a broad range of topics such as the impact of colonialism and its associated discourses on First Nations and other groups of colonised women; racism in the Canadian labour movement; the impact of globalisation on women of colour; the ways in which the institution of the nuclear family shapes racism; sexism in communities of colour; and the ways in which the women's movement can create an anti-racist praxis. The book not only provides exciting new insights into how women of colour experience Canadian society, but also provides instructors with a textbook that integrates anti-racist and feminist approaches. An authoritative and cutting-edge collection of theoretically grounded and empirically informed essays exploring the contemporary terrain of race and racism. This revised and expanded edition, new in paperback, provides a definitive collection on the current period in feminism known by many as the 'third wave'. Three sections - genealogies and generations, locales and locations, politics and popular culture - interrogate the wave metaphor and, through questioning the generational account of feminism, indicate possible future trajectories for the feminist movement. New to this edition are an interview with Luce Irigaray, a foreword by Imelda Whelehan as well as newly commissioned chapters. In this wide-ranging second edition, Richard Delgado and Jean Stefancic bring together the finest, most illustrative, and highly accessible articles in the fast-growing legal genre of Critical Race Theory. In challenging orthodoxy, questioning the premises of liberalism, and debating sacred wisdoms, Critical Race Theory scholars writing over the past few years have indelibly changed the way America looks at race. This edition contains treatment of all the topics covered in the first edition, along with provocative and probing questions for discussion and detailed suggestions for additional reading, all of which set this fine volume apart from the field. In addition, this edition contains five new substantive units -- crime, critical race practice, intergroup tensions and alliances, gay/lesbian issues, and transcending the black-white binary paradigm of race. In each of these areas, groundbreaking scholarship by the movement's founding figures as well as the brightest new stars provides immediate entre to current trends and developments in critical civil rights thought. Recently, Black women have taken the world stage in national politics, popular culture, professional sports, and bringing attention to racial injustice in policing and the judicial system. However, rarely are Black women acknowledged and highlighted for their efforts to understand the social problems confronting our generation and those generations that came before us. In the post-civil rights era, research faculty and theoreticians must acknowledge the marginalization of Black women scholars' voices in contemporary qualitative scholarship and

debates. *Black Feminism in Qualitative Inquiry: A Mosaic for Writing our Daughter's Body* engages qualitative inquiry to center the issues and concerns of Black women as researcher(s) and the researched while simultaneously questioning the ostensible innocence of qualitative inquiry, including methods of data collection, processes of data analysis, and representations of human experiences and identities. The text centers "daughtering" as the onto-epistemological tool for approaches to Black feminist and critical race data analysis in qualitative inquiry. Advanced and novice researchers interested in decolonizing methodologies and liberatory tools of analysis will find the text useful for cultural, education, political, and racial critiques that center the intersectional identities and interpretations of Black women and girls and other people of color. Daughtering as a tool of analysis in Black feminist qualitative inquiry is our own cultural and spiritual way of being, doing, and performing decolonizing work. Many feminists grapple with the problem of hyper-incarceration in the United States, and yet commentators on gender crime continue to assert that criminal law is not tough enough. This punitive impulse, prominent legal scholar Aya Gruber argues, is dangerous and counterproductive. In their quest to secure women's protection from domestic violence and rape, American feminists have become soldiers in the war on crime by emphasizing white female victimhood, expanding the power of police and prosecutors, touting the problem-solving power of incarceration, and diverting resources toward law enforcement and away from marginalized communities. Deploying vivid cases and unflinching analysis, *The Feminist War on Crime* documents the failure of the state to combat sexual and domestic violence through law and punishment. Zero-tolerance anti-violence law and policy tend to make women less safe and more fragile. Mandatory arrests, no-drop prosecutions, forced separation, and incarceration embroil poor women of color in a criminal justice system that is historically hostile to them. This carceral approach exacerbates social inequalities by diverting more power and resources toward a fundamentally flawed criminal justice system, further harming victims, perpetrators, and communities alike. In order to reverse this troubling course, Gruber contends that we must abandon the conventional feminist wisdom, fight violence against women without reinforcing the American prison state, and use criminalization as a technique of last—not first—resort. *The SAGE Guide to Curriculum in Education* integrates, summarizes, and explains, in highly accessible form, foundational knowledge and information about the field of curriculum with brief, simply written overviews for people outside of or new to the field of education. This Guide supports study, research, and instruction, with content that permits quick access to basic information, accompanied by references to more in-depth presentations in other published sources. This Guide lies between the sophistication of a handbook and the brevity of an encyclopedia. It addresses the ties between and controversies over public debate, policy making, university scholarship, and school practice. While tracing complex traditions, trajectories, and evolutions of curriculum scholarship, the Guide illuminates how curriculum ideas, issues, perspectives, and possibilities can be translated into public debate, school practice, policy making, and life of the general public focusing on the aims of education for a better human condition. 55 topical chapters are organized into four parts: Subject Matter as Curriculum, Teachers as Curriculum, Students as Curriculum, and Milieu as Curriculum based upon the conceptualization of curriculum commonplaces by Joseph J. Schwab: subject matter, teachers, learners, and milieu. The Guide highlights and explicates how the four commonplaces are interdependent and interconnected in the decision-making processes that involve local and state school boards and government agencies, educational institutions, and curriculum stakeholders at all levels that address the central curriculum questions: What is worthwhile? What is worth knowing, needing, experiencing, doing, being, becoming, overcoming, sharing, contributing, wondering, and imagining? The Guide benefits undergraduate and graduate students, curriculum professors, teachers, teacher educators, parents, educational leaders, policy makers, media writers, public intellectuals, and other educational workers. Key Features: Each chapter inspires readers to understand why the particular topic is a cutting edge curriculum topic; what are the pressing issues and contemporary concerns about the topic; what historical, social, political, economic, geographical, cultural, linguistic, ecological, etc. contexts surrounding the topic area; how the topic, relevant practical and policy ramifications, and contextual embodiment can be understood by theoretical perspectives; and how forms of inquiry and modes of representation or expression in the topic area are crucial to develop understanding for and make impact on practice,

policy, context, and theory. Further readings and resources are provided for readers to explore topics in more details. For well over a decade, critical race theory—the school of thought that holds that race lies at the very nexus of American life—has roiled the legal academy. In recent years, however, the fundamental principles of the movement have influenced other academic disciplines, from sociology and politics to ethnic studies and history. And yet, while the critical race theory movement has spawned dozens of conferences and numerous books, no concise, accessible volume outlines its basic parameters and tenets. Here, then, from two of the founders of the movement, is the first primer on one of the most influential intellectual movements in American law and politics. The contributions to this collection are written by legal advocates, community activists and legal scholars. The ten essays examine theories of intersectionality to demonstrate how race, class, sexual orientation, gender and identity have been integrated into legal scholarship and activism in an attempt to shape legal policy and practice. A classic anthology of writings on the legal status and lived experiences of women of color Now in its second edition, the acclaimed anthology *Critical Race Feminism* presents over 40 readings on the legal status of women of color by leading authors and scholars such as Anita Hill, Lani Guinier, Kathleen Neal Cleaver, and Angela Harris. The collection gives voice to Black, Latina, Asian, Native American, and Arab women, and explores both straight and queer perspectives. Both a forceful statement and a platform for change, the anthology addresses an ambitious range of subjects, from life in the workplace and motherhood to sexual harassment, domestic violence, and other criminal justice issues. Extending beyond national borders, the volume tackles global issues such as the rights of Muslim women, immigration, multiculturalism, and global capitalism. Revealing how the historical experiences and contemporary realities of women of color are profoundly influenced by a legacy of racism and sexism that is neither linear nor logical, *Critical Race Feminism* serves up a panoramic perspective, illustrating how women of color can find strength in the face of oppression. In the past few years, a new generation of progressive intellectuals has dramatically transformed how law, race, and racial power are understood and discussed in America. Questioning the old assumptions of both liberals and conservatives with respect to the goals and the means of traditional civil rights reform, critical race theorists have presented new paradigms for understanding racial injustice and new ways of seeing the links between race, gender, sexual orientation, and class. This reader, edited by the principal founders and leading theoreticians of the critical race theory movement, gathers together for the first time the movement's most important essays. M. Jacqui Alexander is one of the most important theorists of transnational feminism working today. *Pedagogies of Crossing* brings together essays she has written over the past decade, uniting her incisive critiques, which have had such a profound impact on feminist, queer, and critical race theories, with some of her more recent work. In this landmark interdisciplinary volume, Alexander points to a number of critical imperatives made all the more urgent by contemporary manifestations of neoimperialism and neocolonialism. Among these are the need for North American feminism and queer studies to take up transnational frameworks that foreground questions of colonialism, political economy, and racial formation; for a thorough re-conceptualization of modernity to account for the heteronormative regulatory practices of modern state formations; and for feminists to wrestle with the spiritual dimensions of experience and the meaning of sacred subjectivity. In these meditations, Alexander deftly unites large, often contradictory, historical processes across time and space. She focuses on the criminalization of queer communities in both the United States and the Caribbean in ways that prompt us to rethink how modernity invents its own traditions; she juxtaposes the political organizing and consciousness of women workers in global factories in Mexico, the Caribbean, and Canada with the pressing need for those in the academic factory to teach for social justice; she reflects on the limits and failures of liberal pluralism; and she presents original and compelling arguments that show how and why transgenerational memory is an indispensable spiritual practice within differently constituted women-of-color communities as it operates as a powerful antidote to oppression. In this multifaceted, visionary book, Alexander maps the terrain of alternative histories and offers new forms of knowledge with which to mold alternative futures. This handbook illustrates how education scholars employ Critical Race Theory (CRT) as a framework to bring attention to issues of race and racism in education. It is the first authoritative reference work to provide a truly comprehensive description and analysis of the topic, from the

defining conceptual principles of CRT in Law that gave shape to its radical underpinnings to the political and social implications of the field today. It is divided into six sections, covering innovations in educational research, policy and practice in both schools and in higher education, and the increasing interdisciplinary nature of critical race research. New chapters broaden the scope of theoretical lenses to include LatCrit, AsianCrit and Critical Race Feminism, as well as coverage of Disability Studies, Research Methods, and other recent updates to the field. This handbook remains the definitive statement on the state of critical race theory in education and on its possibilities for the future. The *Critical Turn in Education* traces the historical emergence and development of critical theories in the field of education, from the introduction of Marxist and other radical social theories in the 1960s to the contemporary critical landscape. The book begins by tracing the first waves of critical scholarship in the field through a close, contextual study of the intellectual and political projects of several core figures including, Paulo Freire, Samuel Bowles and Herbert Gintis, Michael Apple, and Henry Giroux. Later chapters offer a discussion of feminist critiques, the influx of postmodernist and poststructuralist ideas in education, and critical theories of race. While grounded in U.S. scholarship, *The Critical Turn in Education* contextualizes the development of critical ideas and political projects within a larger international history, and charts the ongoing theoretical debates that seek to explain the relationship between school and society. Today, much of the language of this critical turn has now become commonplace—words such as "hegemony," "ideology," and the term "critical" itself—but by providing a historical analysis, *The Critical Turn in Education* illuminates the complexity and nuance of these theoretical tools, which offer ways of understanding the intersections between individual identities and structural forces in an attempt to engage and overturn social injustice.

The purpose of this ethnographic study was to explore how the community cultural wealth experiences of South Asian American women help or hinder their persistence through higher education. Although there is current literature regarding Asian Americans in higher education, there is not a strong foundation in the experiences of South Asian Americans, especially South Asian American women. The theoretical frameworks that were used to guide this study were community cultural wealth and critical race feminism. Ten semi-structured interviews were conducted to identify similar themes identified by South Asian American women regarding their persistence experiences. The interviews were conducted at a minority serving four-year public institution in southern California. The goal of the study was to help fill the gap in the literature regarding South Asian students in higher education along with providing recommendations for policy and practice. The main community cultural wealth capitals mentioned by these women were familial as well as aspirational, but these women used their own drives to persist in their educational journeys. They all felt that their own motivations were the strongest components in their education. At the end, many of them mentioned that there was additional factor that helped them to continue in their education: the desire to not get married. Although this was not mentioned as a significant point for all of the women, it did come up enough to be considered significant for this study. The fact that these women were using their education as a means to avoid getting married and settling down was a factor in retention that has not been discussed in literature. The recommendations for this study focused on discussions that came up in the interview as well as prospects for further research. The women interviewed all discussed a lack of "role models" in their everyday lives on campus. They felt that they did not have the best exposure to other South Asian American women not just in their classes, but in their specific majors. Even though all of the women were in STEM related fields, they did not feel fully supported because they did not find that anyone would be able to fully understand what they were going through on a daily basis. The institutional recommendations made by these women focused on the possibility of offering more courses related to South Asians in general and possibly a larger more noticeable presence in the administrative positions. In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought. This book

develops an intersectional feminist approach to moral responsibility. It accomplishes four main goals. First, it outlines a concise list of the main principles of intersectional feminism. Second, it uses these principles to critique prevailing philosophical theories of moral responsibility. Third, it offers an account of moral responsibility that is compatible with the ethos of intersectional feminism. And fourth, it uses intersectional feminist principles to critique culturally normative responsibility practices. This is the first book to provide an explicitly intersectional feminist approach to moral responsibility. After identifying the five principles central to intersectional feminism, the author demonstrates how influential theories of responsibility are incompatible with these principles. She argues that a normatively adequate theory of blame should not be preoccupied with the agency or traits of wrongdoers; it should instead underscore, and seek to ameliorate, oppression and adversity as experienced by the marginalized. Apt blame and praise, according to her intersectional feminist account, is both communicative and functionalist. The book concludes with an extensive discussion of culturally embedded responsibility practices, including asymmetrically structured conversations and gender- and racially biased social spaces.

An Intersectional Feminist Approach to Moral Responsibility presents a sophisticated and original philosophical account of moral responsibility. It will be of interest to philosophers working at the crossroads of moral responsibility, feminist philosophy, critical race theory, queer theory, critical disability studies, and intersectionality theory. "Informed in 1944 that she was 'not of the sex' entitled to be admitted to Harvard Law School, African American activist Pauli Murray confronted the injustice she called 'Jane Crow.' In the 1960s and 1970s, the analogies between sex and race discrimination pioneered by Murray became potent weapons in the battle for women's rights, as feminists borrowed rhetoric and legal arguments from the civil rights movement. Serena Mayeri's *Reasoning from Race* is the first book to explore the development and consequences of this key feminist strategy. Mayeri uncovers the history of an often misunderstood connection at the heart of American antidiscrimination law. Her study details how a tumultuous political and legal climate transformed the links between race and sex equality, civil rights and feminism. Battles over employment discrimination, school segregation, reproductive freedom, affirmative action, and constitutional change reveal the promise and peril of reasoning from race--and offer a vivid picture of Pauli Murray, Ruth Bader Ginsburg, and others who defined feminists' agenda. Looking beneath the surface of Supreme Court opinions to the deliberations of feminist advocates, their opponents, and the legal decisionmakers who heard--or chose not to hear--their claims, *Reasoning from Race* showcases previously hidden struggles that continue to shape the scope and meaning of equality under the law"--Publisher description

In this book, the authors, all legal scholars from the tradition of critical race theory start from the experience of injury from racist hate speech and develop a theory of the first amendment that recognizes such injuries. In their critique of "first amendment orthodoxy", the authors argue that only a history of racism can explain why defamation, invasion of privacy and fraud are exempt from free-speech guarantees but racist verbal assault is not. "This brilliant and timely collection takes us far in documenting the complex intrapsychic worlds and intersubjective relations of race, gender, and culture. Questions concerning how race and ethnicity create and refract unconscious fantasy and self-construction must be at the forefront of contemporary psychoanalytic thinking."—Nancy J. Chodorow, author of *The Reproduction of Mothering* "Bold. Daring. Provocative. This collection of essays emphatically demonstrates that rhetorical meaning, constituted in the text and the world, evolves from mediations of the psychical and the material, the personal and the social. The critical models displayed so forcefully here will not only influence psychoanalytic and feminist discourses but literary and cultural studies as well."—Claudia Tate, *George Washington University Global Intersectionality and Contemporary Human Rights* argues for an expansive definition of human rights, one that encompasses the harm caused by multiple, intersecting forms of subordination. Intersectionality theory posits that aspects of identity, such as race and gender, are mutually constitutive and intersect to create unique experiences of discrimination and subordination. Perpetrators of sexual violence in armed conflict, of example, often target women based on both gender and ethnicity. Human rights remedies that fail to capture the intersectional nature of human rights violations do not offer comprehensive redress to victims. This title explores the influence of intersectionality theory on human rights in the modern era and traces the evolution of intersectionality as a theoretical framework in the United States and around the world. It draws

upon feminist theory and human rights jurisprudence to argue that scholars and activists have under-utilized intersectionality theory in the global discourse of human rights. As the central intergovernmental organization charged with the protection of human rights, the United Nations has been slow to embrace the insights gained from intersectionality theory. This work argues that the United Nations and other human rights organizations must more actively embrace intersectionality as an analytical framework in order to fully address the complexity of human rights violations around the world. An anthology containing some 30 essays which focus on topics including a critique of American feminist legal scholarship; motherhood and work in cultural context; Josephine Baker and the Cold War; the campaign against female circumcision; violence against Aboriginal women in Australia; and "marketization" and the status of women in China. Includes a foreword by social justice activist and professor at the U. of California-Santa Cruz, Angela Y. Davis. Annotation copyrighted by Book News Inc., Portland, OR Its opponents call it part of "the lunatic fringe," a justification for "black separatism," "the most embarrassing trend in American publishing." "It" is Critical Race Theory. But what is Critical Race Theory? How did it develop? Where does it stand now? Where should it go in the future? In this volume, thirty-one CRT scholars present their views on the ideas and methods of CRT, its role in academia and in the culture at large, and its past, present, and future. Critical race theorists assert that both the procedures and the substance of American law are structured to maintain white privilege. The neutrality and objectivity of the law are not just unattainable ideals; they are harmful actions that obscure the law's role in protecting white supremacy. This notion—so obvious to some, so unthinkable to others—has stimulated and divided legal thinking in this country and, increasingly, abroad. The essays in *Crossroads, Directions, and a New Critical Race Theory*—all original—address this notion in a variety of helpful and exciting ways. They use analysis, personal experience, historical narrative, and many other techniques to explain the importance of looking critically at how race permeates our national consciousness. "Wilderson's thinking teaches us to believe in the miraculous even as we decry the brutalities out of which miracles emerge"—Fred Moten Praised as "a trenchant, funny, and unsparing work of memoir and philosophy" (Aaron Robertson, *Literary Hub*), Frank B. Wilderson's *Afropessimism* arrived at a moment when protests against police brutality once again swept the nation. Presenting an argument we can no longer ignore, Wilderson insists that we must view Blackness through the lens of perpetual slavery. Radical in conception, remarkably poignant, and with soaring flights of memoir, *Afropessimism* reverberates with wisdom and painful clarity in the fractured world we inhabit. "Wilderson's ambitious book offers its readers two great gifts. First, it strives mightily to make its pessimistic vision plausible. . . . Second, the book depicts a remarkable life, lived with daring and sincerity."—Paul C. Taylor, *Washington Post* *The Routledge Companion to Feminist Philosophy* is an outstanding guide and reference source to the key topics, subjects, thinkers, and debates in feminist philosophy. Fifty-six chapters, written by an international team of contributors specifically for the Companion, are organized into five sections: (1) Engaging the Past; (2) Mind, Body, and World; (3) Knowledge, Language, and Science; (4) Intersections; (5) Ethics, Politics, and Aesthetics. The volume provides a mutually enriching representation of the several philosophical traditions that contribute to feminist philosophy. It also foregrounds issues of global concern and scope; shows how feminist theory meshes with rich theoretical approaches that start from transgender identities, race and ethnicity, sexuality, disabilities, and other axes of identity and oppression; and highlights the interdisciplinarity of feminist philosophy and the ways that it both critiques and contributes to the whole range of subfields within philosophy. What is a Canadian critical race feminism? As the contributors to this book note, the interventions of Canadian critical race feminists work to explicitly engage the Canadian state as a white settler society. The collection examines Indigenous peoples within the Canadian settler state and Indigenous women within feminism; the challenges posed by the settler state for women of colour and Indigenous women; and the possibilities and limits of an anti-colonial praxis. Critical race feminism, like critical race theory more broadly, interrogates questions about race and gender through an emancipatory lens, posing fundamental questions about the persistence if not magnification of race and the "colour line" in the twenty-first century. The writers of these articles whether exploring campus politics around issues of equity, the media's circulation of ideas about a tolerant multicultural and feminist Canada, security practices that confine people of colour to

spaces of exception, Indigenous women's navigation of both nationalism and feminism, Western feminist responses to the War on Terror, or the new forms of whiteness that persist in ideas about a post-racial world or in transnational movements for social justice insist that we must study racialized power in all its gender and class dimensions. The contributors are all members of Researchers and Academics of Colour for Equity. *Critical Race, Feminism, and Education* provides a transformative next step in the evolution of critical race and Black feminist scholarship. Focusing on praxis, the relationship between the construction of race, class, and gender categories and social justice outcomes is analyzed. An applied transdisciplinary model - integrating law, sociology, history, and social movement theory - demonstrates how marginalized groups are oppressed by ideologies of power and privilege in the legal system, the education system, and the media. Pratt-Clarke documents the effects of racism, patriarchy, classism, and nationalism on Black females and males in the single-sex school debate. A major publishing event, the collected writings of the groundbreaking scholar who "first coined intersectionality as a political framework" (Salon) For more than twenty years, scholars, activists, educators, and lawyers—inside and outside of the United States—have employed the concept of intersectionality both to describe problems of inequality and to fashion concrete solutions. In particular, as the *Washington Post* reported recently, "the term has been used by social activists as both a rallying cry for more expansive progressive movements and a chastisement for their limitations." Drawing on black feminist and critical legal theory, Kimberlé Crenshaw developed the concept of intersectionality, a term she coined to speak to the multiple social forces, social identities, and ideological instruments through which power and disadvantage are expressed and legitimized. In this comprehensive and accessible introduction to Crenshaw's work, readers will find key essays and articles that have defined the concept of intersectionality, collected together for the first time. The book includes a sweeping new introduction by Crenshaw as well as prefaces that contextualize each of the chapters. For anyone interested in movement politics and advocacy, or in racial justice and gender equity, *On Intersectionality* will be compulsory reading from one of the most brilliant theorists of our time. This exciting new Handbook offers a comprehensive overview of the contemporary state of the field in feminist philosophy. The editors' introduction and forty-five essays cover feminist critical engagements with philosophy and adjacent scholarly fields, as well as feminist approaches to current debates and crises across the world. Authors cover topics ranging from the ways in which feminist philosophy attends to other systems of oppression, and the gendered, racialized, and classed assumptions embedded in philosophical concepts, to feminist perspectives on prominent subfields of philosophy. The first section contains chapters that explore feminist philosophical engagement with mainstream and marginalized histories and traditions, while the second section parses feminist philosophy's contributions to numerous philosophical subfields, for example metaphysics and bioethics. A third section explores what feminist philosophy can illuminate about crucial moral and political issues of identity, gender, the body, autonomy, prisons, among numerous others. The Handbook concludes with the field's engagement with other theories and movements, including trans studies, queer theory, critical race, theory, postcolonial theory, and decolonial theory. The volume provides a rigorous but accessible resource for students and scholars who are interested in feminist philosophy, and how feminist philosophers situate their work in relation to the philosophical mainstream and other disciplines. Above all it aims to showcase the rich diversity of subject matter, approach, and method among feminist philosophers. How have research agendas on race and ethnic relations changed over the past two decades and what new developments have emerged? *Theories of Race and Ethnicity* provides a comprehensive and cutting-edge collection of theoretically grounded and empirically informed essays. It covers a range of key issues in race and ethnicity studies, such as genetics and race, post-race debates, racial eliminativism and the legacy of Barack Obama, and mixed race identities. The contributions are by leading writers on a range of perspectives employed in studying ethnicity and race, including critical race feminism, critical rationalism, psychoanalysis, performativity, whiteness studies and sexuality. Written in an authoritative yet accessible style, this volume is suitable for researchers and advanced students, offering scholars a survey of the state of the art in the literature, and students an overview of the field. This study reinterprets a crucial period (1870s-1920s) in the history of women's rights, focusing attention on a core contradiction at the heart of early feminist theory. At a time when white elites were

concerned with imperialist projects and civilizing missions, progressive white women developed an explicit racial ideology to promote their cause, defending patriarchy for "primitives" while calling for its elimination among the "civilized." By exploring how progressive white women at the turn of the century laid the intellectual groundwork for the feminist social movements that followed, Louise Michele Newman speaks directly to contemporary debates about the effect of race on current feminist scholarship. "White Women's Rights is an important book. It is a fascinating and informative account of the numerous and complex ties which bound feminist thought to the practices and ideas which shaped and gave meaning to America as a racialized society. A compelling read, it moves very gracefully between the general history of the feminist movement and the particular histories of individual women."--Hazel Carby, Yale University Exploring the relational aspects of difference and the implications for re-conceptualizing anti-racism discourse and practice, this book seeks to incite the reader to broaden the examination of social spaces through the lens of an anti-racist, feminist scholarship and practice. "In the completely updated second edition of this outstanding primer, Nancy Levit and Robert R.M. Verchick introduce the diverse strands of feminist legal theory and discuss an array of substantive legal topics, pulling in recent court decisions, new laws, and important shifts in culture and technology. The book centers on feminist legal theories, including equal treatment theory, cultural feminism, dominance theory, critical race feminism, lesbian feminism, postmodern feminism, and ecofeminism. Readers will find new material on women in politics, gender and globalization, and the promise and danger of expanding social media. Updated statistics and empirical analysis appear throughout. At its core, Feminist Legal Theory shows the importance of the roles of law and feminist legal theory in shaping contemporary gender issues"--Unedited summary from book cover.
