*Merging Numeracy with Literacy Practices for Equity in Multilingual Early Year Settings Oct 07 2021 This book draws on both in and out of school literacy practices with teachers and families to enhance the numeracy of early learners. It provides highly illustrative exemplars, targeted for learners up to approximately eight years of age whose home language differs from the language of instruction. It identifies the challenges faced by these learners and their families, and shares ways of building both literacy and numeracy skills for some of the vulnerable learners nationally and internationally. The book shares the outcomes and strategies for teaching mathematics to early years learners and highlights the importance of literacy practices for learners for whom the language of instruction is different from their home language. Readers will gain a practical sense of how to create contexts, classrooms and practices to scaffold these learners to build robust understandings of mathematics.*

*Beneath the Surface Aug 05 2021 For more than a century, skin lighteners have been a ubiquitous feature of global popular culture—embraced by consumers even as they were fiercely opposed by medical professionals, consumer health advocates, and antiracist thinkers and activists. In *Beneath the Surface*, Lynn M. Thomas constructs a transnational history of skin lighteners in South Africa and beyond. Analyzing a wide range of archival, popular culture, and oral history sources, Thomas traces the changing meanings of skin color from precolonial times to the postcolonial present. From indigenous skin-brightening practices and the rapid spread of lighteners in South African consumer culture during the 1940s and 1950s to the growth of a billion-dollar global lightener industry, Thomas shows how the use of skin lighteners and experiences of skin color have been shaped by slavery, colonialism, and segregation as well as by consumer capitalism, visual media, notions of beauty, and protest politics. In teasing out lighteners' layered history, Thomas theorizes skin as a site for antiracist struggle and lighteners as a technology of visibility that both challenges and entrenches racial and gender hierarchies.*

*Salsa Dancing in Gym Shoes Oct 15 2019 Cultural competence is a critical skill teachers must possess if they are going to connect with racially diverse students. Misunderstanding or ignorance of the Latino value system, history, and culture create barriers between teachers and students that significantly deteriorate their potential for learning. Consider how you would typically greet a friend or a relative. Perhaps you would shake hands or even hug. In the Latino culture, it's common to greet loved ones with an embrace and a kiss on the cheek. Anything less may be taken as an affront. If something as simple as "hello" can create tension, how challenging is it to navigate teaching and learning in the classroom? *Salsa Dancing in Gym Shoes* takes a close look at interactions between Latino students and Non-Latino teachers in ways that develop and expand the cultural competence of teachers. Preservice and veteran educators alike will benefit from current research and theories on Latinos and education as well as the personal essays presenting that reveal the raw perspective of Latinos as they deal with racism and marginalization. Educators will have a deeper understanding of the Latino experience and practical strategies for creating a positive and safe environment for learning.*

*Teresa walked out the door one July afternoon in 1994, her son filled the void she left with a series of unusual rituals. Twenty-three years later, he lies in bed, reconstructing the events surrounding his mother's disappearance. Did she actually join the Zapatistas in the jungles of Chiapas, as he was led to believe? He dissects his memories of that fateful summer until a startling discovery shatters his conception of his family's story. Daniel Saldaña París (Among Strange Victims) returns with an emotionally rich anti-coming-of-age novel that wrestles with the inherited privileges and crimes of masculinity.*

*Recommendation on Social Protection Floors Aug 17 2022 Despite the international community's recognition of social protection as a human right, the vast majority of the world's population still has no access to social protection. In a major effort to address this situation, the International Labour Conference unanimously adopted the Social Protection Floors Recommendation 202 of 2012. However, because of the wide variety of possible schemes (and techniques that can be employed to administer them), there is a genuine risk that important values relating to social protection will be overlooked in implementing the Recommendation. This collection of expert essays contains an in-depth clarification and analysis of the Recommendation and sets forth a clear and practicable set of principles that can be used both as a policy tool and as an assessment framework for the creation, maintenance, and supervision of a national social protection floor. This book pays detailed attention to each of the Recommendation's key principles, including the following: – state responsibility; – universality of protection; – entitlement based in law; – adequacy and predictability of benefits; – non-discrimination; – financial solidarity; – good governance; – coherence of policies; and – social participation. A special feature of the book is its inclusion of case studies that display innovative social protection schemes focusing on children and families, persons of working age (particularly informal sector workers), and elderly persons. A concluding section offers useful insights on measures that can be taken and lessons learned. As a deeply informed and practical guide to ways in which states can (and do) establish and maintain a social protection floor as a fundamental element of their national social protection systems, this book has no peers. It will be warmly welcomed by jurists concerned with social protection throughout the world, by pertinent government agencies at all levels, by non-governmental organizations, and by academics in the field.*

*a resource for learning in multilingual or linguistically diverse classrooms. While English has become the world language, most communities remain, and are becoming more and more multicultural, multilingual, and diverse. The Handbook of Research on Teaching in Multicultural and Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism, and multilingualism in different learning areas, giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations. Covering topics such as Indigenous languages, multilingual deaf communities, and intercultural competence, this major reference work is an essential resource for educators of both K-12 and higher education, pre-service teachers, educational psychologists, linguists, education administrators and policymakers, government officials, researchers, and academicians.*

*Speaking Subjects in Multilingualism Research Dec 29 2020 This book discusses salient moments of multilingual encounters and brings together contributions focused on the interplay between language use by individuals and societies, and language-related inequalities or opportunities for speakers. The chapters demonstrate how biographical and speaker-centred approaches can contribute to an understanding of linguistic diversity, how researchers can empirically account for lived experiences of languages, and how such accounts are embedded in a larger discussion on social (in)equality. Together the chapters make a powerful case for the importance of speaker-centred methodologies in multilingual and multilingualism research. The book is a rich source of theoretical and methodological reflections and will thus be a valuable resource for both experienced researchers and students beginning to explore biographical research methods.*

*Lobola (Bridewealth) in Contemporary Southern Africa Nov 08 2021 This volume explores the multiple meanings and implications of lobola in Southern Africa. The payment of lobola (often controversially translated as 'bridewealth') is an entrenched practice in most societies in Southern Africa. Although having a long tradition, of late there have been voices questioning its relevance in contemporary times while others vehemently defend the practice. This book brings together a range of scholars from different academic disciplines, national contexts, institutions, genders, and ethnic backgrounds to debate the relevance of lobola in contemporary southern African communities for gender equality.*

*Minority Protection in Post-apartheid South Africa* May 02 2021 Accommodation of population diversity is a vital issue for any multinational society. The legacy of Apartheid in South Africa complicates this effort considerably. Henrard introduces a theoretical framework regarding how to accommodate minority protection in the most appropriate way and analyzes the respective contributions of individual rights, minority rights, and the right to self-determination. Subsequent chapters examine the case study of post-apartheid South Africa and attempt to investigate its constitutional development. Henrard finds that provisions within the 1996 Constitution do acknowledge an interrelation between these three important factors; however, implementation of minority protection policy is often quite a different matter. In seeking appropriate means of minority protection, this study stresses inclusionism, integration, and the essential right to identity and real equality. While Henrard reviews and discusses the entire democratic transformation process in South Africa, she cautions that, because current developments are characterized by their unsettled nature, major transformation and flux, analysis of the implementation phase can be only indicative. The apartheid history does not in itself inhibit progressive stances on this important issue. Still, despite the promising nature of the 1996 Constitution, the picture that emerges in terms of policy development aimed at minority protection is ambivalent.

Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during*

*Language Vitality in South Africa Jan 22 2023 Seminar paper from the year 2011 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,3, Ernst Moritz Arndt University of Greifswald (Anglistik/Amerikanistik), course: Hauptseminar: English in Contact, language: English, abstract: There are 24 languages which are regularly used by more than 44.8 million South Africans and almost 80 % of the South African population use one of the African languages at home. "The most commonly spoken home language is isiZulu, which is spoken by 23.8 % of the population, followed by isiXhosa (17.6 %) and Afrikaans (13.3 %)" Although English is the home language of only 8.2 % of the South African population it is still used as a lingua franca throughout the nation. The eleven official languages are used by 99% of the country's population and those languages are all supposed to have equal rights. Belonging to these languages are English and Afrikaans, and nine other African languages: "Sepedi, Sesotho, Setswana, siSwati, Tshivenda, Xitsonga, isiNdebele, isiXhosa, and isiZulu". There are also many other languages spoken in South Africa like for example Arabic, German, Greek, Hindi, Tamil, Hebrew and many more. Some European languages like French, German, and Portuguese are used in South Africa but they are not nearly as influential as English. The historical development of South Africa has brought the question of language forward. The country became aware of its unique language situation and the chances and problems which are connected to it. After Mandela many people developed a greater interest in smaller languages. The paper is going to explore the language vitality of some of the 11 official South African languages, dealing with the problem of language endangerment/death and language revitalisation. It is going to be seen whether the multilingualism which is propagandized by the government is or can be realised in real life. Due to the lack of valid information for many of the smaller indigenous African languages the paper will mostly look at the situation of Afrikaans and English, only rarely considering the other languages in much detail.*
