Civil War Missouri Compendium, The: Almost Unabridged Apr 02 2021 During the Civil War, only Virginia and Tennessee saw more action than Missouri. Ulysses S. Grant first proved his ability there. Sterling Price, a former governor of Missouri, sided with the Confederacy, raised an army and led it in battle all over the state. Notorious guerrilla warriors "Bloody" Bill Anderson and William Quantrill terrorized communities and confounded Union military commanders. Brian Warren and Joseph "Whit" McCoskrie provide a chronological overview of more than three hundred of the documented engagements that took place within Missouri's borders, furnishing photos, maps, biographical sketches and military tactics.

Science and Applications of Coastal Remote Sensing Jul 25 2020
IN MEMORIAL: This Research Topic is dedicated to our co-editor Dr. Tiffany Moisan, a well-regarded ocean color remote sensing scientist, who unexpectedly passed away during its preparation. Dr. Moisan was a dear friend, and upbeat and enthusiastic colleague and a scientist committed to the use of remote sensing to improve our understanding of marine microbiology and phytoplankton ecology. She was a strong supporter of the development of remote sensing capabilities and applications for coastal and inland waters, and we know that she would have wanted this Research Topic to provide her colleagues an opportunity to share and promote their work in this area. A voice in our community is now quiet. Let the chorus of our shared song continue with her memory. Dr. Tiffany Moisan is survived by her loving family, including her husband, Dr. John Moisan and her two daughters.

Descendants of William Cromartie and Ruhamah Doane Feb 24 2023 This ambitious work chronicles 250 years of the Cromartie Family genealogical history. Included in the index of nearly 50,000 names are the current generations, and all of those preceding, which trace ancestry to our family patriarch, William Cromartie who was born in 1731 in Orkney, Scotland and his second wife, Ruhamah Doane who was born in 1745. Arriving in America in 1758, William Cromartie settled and developed a plantation on South River, a tributary of the Cape Fear near Wilmington, North Carolina. On April 2, 1766, William married Ruhamah Doane, a fifth generation descendant of a Mayflower passenger to Plymouth, Stephen Hopkins. If Cromartie is your last name, or that of one of your blood relatives, it is almost certain that you can trace your ancestry to one of the thirteen children of William Cromartie, his first wife, and Ruhamah Doane, who became the founding ancestors of our Cromartie Family in America: William Jr, James, Thankful, Elizabeth, Hannah Ruhamah, Alexander, John, Margaret Nancy, Mary, Catherine, Jean, Peter Patrick, and Ann E. Cromartie. These four volumes hold an account of the descent of each of these first-generation Cromarties in America,

including personal antidotes, photographs, copies of family Bibles, wills and other historical documents. Their pages hold a personal record of our ancestors and where you belong in the Cromartie Family Tree.

Callaway Aug 18 2022 The city of Callaway is located in the Florida Panhandle near the Gulf Coast. Settlers migrated to the area beginning in the 1800s, and in 1856, Pitt Milner Callaway purchased property there, hoping to create a large seaport town. He operated a sawmill, but when it was destroyed in a hurricane in 1858, he left the area and did not return until the 1880s. During the land boom, he built another sawmill and began planning wider streets and home sites. Success in fishing, sawmills, boat building, and a paper mill allowed for growth in the community, which was first incorporated in 1936 with Mayor Albert Reese Patterson. Today the city honors its first mayor, who served for 23 years and lived to be 100, every year on his birthday.

[The Highlands Controversy](#) Sep 07 2021 The Highlands Controversy is a rich and

perceptive account of the third and last major dispute in nineteenth-century geology stemming from the work of Sir Roderick Murchison. The earlier Devonian and Cambrian-Silurian controversies centered on whether the strata of Devon and Wales should be classified by lithological or paleontological criteria, but the Highlands dispute arose from the difficulties the Scottish Highlands presented to geologists who were just learning to decipher the very complex processes of mountain building and metamorphism. David Oldroyd follows this controversy into the last years of the nineteenth century, as geology was transformed by increasing professionalization and by the development of new field and laboratory techniques. In telling this story, Oldroyd's aim is to analyze how scientific knowledge is constructed within a competitive scientific community—how theory, empirical findings, and social factors interact in the formation of knowledge. Oldroyd uses archival material and his own extensive reconstruction of the nineteenth-century fieldwork in a case study showing how detailed maps and sections made it possible to understand the exceptionally complex geological structure of the Highlands. An invaluable addition to the history of geology, *The Highlands Controversy* also makes important contributions to our understanding of the social and conceptual processes of scientific work, especially in times of heated dispute.
