Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), and endorsed by the University of Maryland, Baltimore County (UMBC) and the International Association of Flight and Critical Care Providers (IAFCCP), *Critical Care Transport, Second Edition*, offers cutting-edge content relevant to any health care provider training in critical care transport. Authored by leading critical care professionals from across the country, *Critical Care Transport, Second Edition*, contains state-of-the-art information on ground and flight transport that aligns with the latest evidence-based medicine and practices. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, tra Providing precise coverage of all the topics a candidate needs to study for the registered nurse licensing exam, this updated edition blends the ideal level of discussion, drawings, tables, and case studies into an easily digestible format for study. Includes five practice exams and two complete mock NCLEX exams, along with hundreds of additional questions on the accompanying CD. This book presents a holistic approach to women's midlife and menopause transitions. It provides a balanced approach giving the expected benefits and side effects of western medical and complementary therapies for the entire range of menopausal concerns. Comprehensive information provided in a user-friendly way, including a matrix for finding western and alternative therapies for each symptom. Contained are graphs, illustrations, charts and worksheets to enhance learning and allow women to individualize the material. Special focus is placed on art that represents expansive, powerful, and symbolic aspects of women's beings; including a wide array of goddess and mythic images. The path of women's spiritual unfolding is described, with its unique features as they connect with the feminine divine. Women are brought in touch with their long heritage of archetypes in history and myth, and given guidance in drawing from the energies of archetypes to bring deeper aspects of the self into expression. (key words: midlife, menopause, holistic, middle aged) A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the *Making Sense of Data* series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, *Making Sense of Data II* addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, *Making Sense of Data II* is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization. Created by world-renowned programming instructors Paul and Harvey Deitel, *Visual Basic 2008 How to Program, Fourth Edition* introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has

incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

AUDIENCE: Appropriate for anyone interested in learning programming with Visual Basic 2008. A journalistic look at the shooting at Marjory Stoneman Douglas High School in Parkland and the fight for gun control--as told by the student reporters for the school's newspaper and TV station. This timely and media-driven approach to the Parkland shooting, as reported by teens in the journalism and broadcasting programs and in the Marjory Stoneman Douglas newspaper, is an inside look at that tragic day and the events that followed that only they could tell. It showcases how the teens have become media savvy and the skills they have learned and honed--harnessing social media, speaking to the press, and writing effective op-eds. Students will also share specific insight into what it has been like being approached by the press and how that has informed the way they interview their own subjects. "One thing is clear: The Parkland students are smart, media savvy, and here to fight for common sense gun laws." -- Hello Giggles Describes what women seek in a man and the steps a man needs to take to win women over. Clover makes a new best friend, uncovers the secret of a haunted spring, gets chased by a hungry farmer, and fights a big bad fox! Go, Clover, Go! -- VIZ Media Provides an introduction to magnetism and the creation, forces, and applications of magnets. Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play. His Principles of Human Knowledge has become a focal point in the understanding of empiricist thought and the development of eighteenth century philosophy. This volume introduces and assesses: * Berkeley's life and the background to the Principles * The ideas and text in the Principles * Berkeley's continuing importance to philosophy. Gottlob Frege (1848-1925) is considered the father of modern logic and one of the founding figures of analytic philosophy. He was first and foremost a mathematician, but his major works also made important contributions to the philosophy of language. Frege's writings are difficult and deal with technical, abstract concepts. The Routledge Philosophy Guidebook to Frege On Sense and Reference helps the student to get to grips with Frege's thought, and introduces and assesses: the background of Frege's philosophical work Frege's main papers and arguments, focussing on his distinction between sense and reference the continuing importance of Frege's work to philosophy of logic and language. Ideal for those coming to Frege for the first time, and containing fresh insights for anyone interested in his philosophy, this Guidebook is essential reading for all students of philosophy of language, philosophical logic and the history of analytic philosophy. A Sot Zen priest and Dharma successor of Kosho Uchiyama Roshi explores eight of Zen's most essential and universal liturgical texts and explains how the chants in these works support meditation and promote a life of freedom and compassion. Create action-packed 3D games with the Microsoft XNA Framework. More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today. Rene Descartes is generally accepted as the "father of modern philosophy", and his Meditations is perhaps the most famous philosophical text ever written. In this Routledge Philosophy GuideBook, Gary Hatfield guides the reader through the text of the Meditations, providing commentary and analysis throughout. He assesses Descartes' importance in the history of philosophy and his continuing relevance to contemporary thought. Descartes and the Meditations will be essential reading for all students of philosophy, and for anyone coming to Descartes for the first time. Do we know how HIV/AIDS may affect different sectors of society, possibly altering the course set for development? This book presents a multidisciplinary overview of the discourse on HIV/AIDS and explores the concept of human security and the global development agenda. This book explores numerical implementation of Finite Element Analysis using MATLAB. Stressing interactive use of MATLAB, it provides examples and exercises from mechanical, civil and aerospace engineering as well as materials science. The text includes a short MATLAB tutorial. An extensive solutions manual offers detailed solutions to all problems in the book for classroom use. The second edition includes a new brick (solid) element with eight nodes and a one-dimensional fluid flow element. Also added is a review of applications of finite elements in fluid flow, heat transfer, structural dynamics and electro-magnetics. The accompanying CD-ROM presents more than fifty MATLAB functions.
