Does Shareholder Value Require a Revival of Corporate Culture? Feb 25 2021 Bachelor Thesis from the year 2012 in the subject Business economics - Business Ethics, Corporate Ethics, grade: 5 von 5, Free University of Bozen-Bolzano (School of Economics and Management), language: English, abstract: In recent years the problems created by shareholder value as a principle of corporate governance became topic of broad discussions. This thesis tries to answer the question if corporate culture could be able to prevent the problems and risks that emerge by shareholder value. In a first step the concepts of shareholder value and corporate culture are analyzed and defined in detail. For the purpose of this thesis the phenomenon of value is explained as sustainable long-term profit for investors. Secondly, the problems of shareholder value as a principle of corporate governance is examined and it is shown that the main issue in this context is the lack of mutual trust between interest groups within corporations and the moral dilemma resulting from this. Thereafter by comparing corporate culture in different countries it is demonstrated that the German approach in corporate culture is the most convenient in order to create mutual trust. Nevertheless the results of this thesis yield that corporate culture has to be developed over time and cannot be introduced a priori by imposing a new corporate identity. In order to create a strong corporate culture which could solve the moral dilemma an environment of mutual trust between employees, executive officers and shareholders has to be established.

talugaes wittes Dec 18 2022 Thirty-four studies are devoted to the Ancient Near Eastern scholar Stefano de Martino. In accordance with his own research area studies on Ancient Anatolia and North-Syria as well as on Hittite and Akkadian texts are in the focus of the festschrift. Newly discovered texts and archaeological finds are presented, and new aspects of well-known literary compositions and excavation sites of the region are taken into consideration. Further studies focus on history and geography of the north-western part of the Ancient Near East.

A Treatise on Abundance (1638) and Early Modern Views on Poverty and Famine Oct 12 2019 'A "Treatise on Abundance" (1638) and Early Modern Views of Poverty and Famine' is an edited English translation of Carlo Tapia's 'Trattato dell'abondanza'. First published in Naples in 1638, the treatise offered the earliest systematic attempt to develop and publicize the most effective tools available to governments to fight famine and poverty. In particular, Tapia moved the discussion of these issues away from traditional religious approaches and aimed instead to offer a theoretical understanding of the issues—based in part on his study of both classical sources and contemporary legal theories—and practical advice that could help administrators in the provinces and in the capital.

From Cave to Dolmen May 19 2020 Bringing together the scientific contributions of a wide panel of Sicilian and mainland Italian specialists in prehistory, this book focuses on the Sciacca region and its landscape which is extraordinarily rich in natural geological phenomena and associated archaeological activity.

Ambitious Form Jan 27 2021 *Ambitious Form* describes the transformation of Italian sculpture during the neglected half century between the death of Michelangelo and the rise of Bernini. The book follows the Florentine careers of three major sculptors--Giambologna, Bartolomeo Ammanati, and Vincenzo Danti--as they negotiated the politics of the Medici court and eyed one another's work, setting new aims for their art in the process. Only through a comparative look at Giambologna and his contemporaries, it argues, can we understand them individually--or understand the period in which they worked. Michael Cole shows how the concerns of central Italian artists changed during the last decades of the Cinquecento. Whereas their predecessors had focused on specific objects and on the particularities of materials, late sixteenth-century sculptors turned their attention to models and design. The iconic figure gave way to the pose,

individualized characters to abstractions. Above all, the multiplicity of master crafts that had once divided sculptors into those who fashioned gold or bronze or stone yielded to a more unifying aspiration, as nearly every ambitious sculptor, whatever his training, strove to become an architect.
