Daily timed math drills provide the repetition needed to memorize math facts and develop math fluency. Use these reproducible worksheets for skill development or testing. Teachers and parents may reproduce these timed math tests as needed for their students and children. This workbook uses an instructional process that the Author has successfully utilized over 25 years as a math instructor. This unique method builds math skills daily while reinforcing math facts learned on prior days. First, students practice timed multiplication facts involving 0 - 9. Then, multiplication facts of numbers 10 - 13 are introduced. Four days in a row, students practice each new number, followed by two cumulative drills. Using this repetitive process, students gradually build their 0-13 multiplication skills. Set a goal for students to complete one timed-multiplication drill per day. Keep track of the time as well as the number of problems answered correctly. Between drills, students may review the multiplication tables provided at the front of the workbook. Encourage your students to decrease their time while increasing the number of problems answered correctly. Make math fun - set goals and reward students for their progress! This Multiplication practice workbook is designed in such a way that kids can easily solve single-digit problems and can gain confidence in solving any single-digit problem. Each page includes 60 problems and the answer key is at the backside of the problem sheet so that children can verify their answer.
