Truth, Intentionality and Evidence Nov 18 2019

This book provides an anthropological exploration of the ways in which crime is perceived and defined, focusing on notions of truth, intentionality, and evidence. The chapters contain rich ethnographic case studies drawn from work in the Middle East, Africa, India, Mexico and Europe. A variety of instances are discussed, from court proceedings, police reports and newspapers to moments of conflict resolution and reconciliation. Through analysis of this material, the authors reflect on how perception of an act as a crime can differ and how the definition of crime may not be shared by all societies. The approach takes into consideration local standards as well as social, legal and contextual constraints.

Finally, the text presents those principles relating to the law enforcement professional as a witness. This text is written in a clear, lively, and personal style to appeal to criminal justice professionals and students on the way to becoming professionals. Special attention is given to helping students understand the legal aspects of the principles relating to the admissibility of evidence at a criminal court hearing or trial. In *Criminal Evidence*, ninth edition, when an evidence principle is presented, an example or application to the real world of law enforcement immediately follows. Principles of Evidence in International Criminal Justice Sep 28 2020 Principles of Evidence in

International Criminal Justice provides an overview of the procedure and practice concerning the admission and evaluation of evidence before the international criminal tribunals. The book is both descriptive and critical and its emphasis is on day-to-day practice, drawing on the experience of the Yugoslavia, Rwanda and Sierra Leone Tribunals. This book is an attempt to define and explain the core principles and rules that have developed at those ad hoc Tribunals; the rationale and origin of those rules; and to assess the suitability of those rules in the particular context of the International Criminal Court which is still at its early stages. The ICC differs in structure from the ad hoc Tribunals and approaches the legal issues it has to resolve differently from its predecessors. The ICC is however confronted with many of the same questions. The book examines the differences between the ad hoc Tribunals and the ICC and seeks to offer insights as to how and in which circumstances the principles established over years of practice at the ICTY, ICTR and SCSL may serve as guidance to the ICC practitioners of today and the future. The contributors represent a cross-section of the practicing international criminal bar, drawn from the ranks of the Bench, the Prosecution and the Defence and bringing with them different legal domestic cultures. Their mixed background underlines the recurring theme in this book which is the manner in which a legal culture has gradually taken shape in the international Tribunals, drawing on the various traditions and experiences of its

participants.

Criminal and Forensic Evidence Mar 03 2021

Arguments, Stories and Criminal Evidence Jul 19 2022 In this book a theory of reasoning with evidence in the context of criminal cases is developed. The main subject of this study is not the law of evidence but rather the rational process of proof, which involves constructing, testing and justifying scenarios about

what happened using evidence and commonsense knowledge. A central theme in the book is the analysis of ones reasoning, so that complex patterns are made more explicit and clear. This analysis uses stories about what happened and arguments to anchor these stories in evidence. Thus the argumentative and the narrative approaches from the research in legal philosophy and legal psychology are combined. Because the book describes its subjects in both an informal and a formal style, it is relevant for scholars in legal philosophy, AI, logic and argumentation theory. The book can also appeal to practitioners in the investigative and legal professions, who are interested in the ways in which they can and should reason with evidence.

Criminal Procedure Oct 18 2019 Covering the constitutional foundation of criminal procedure in the U.S., this is a contemporary, comprehensive, case-driven textbook from award-winning teacher Matthew R Lippman

In Crime's Archive Feb 02 2021 This book investigates

what happens to criminal evidence after the conclusion of legal proceedings. During the criminal trial, evidentiary material is tightly regulated; it is formally regarded as part of the court record, and subject to the rules of evidence and criminal procedure. However, these rules and procedures cannot govern or control this material after proceedings have ended. In its 'afterlife', criminal evidence continues to proliferate in cultural contexts. It might be photographic or video evidence, private diaries and correspondence, weapons, physical objects or forensic data, and it arouses the interest of journalists, scholars, curators, writers or artists. Building on a growing cultural interest in criminal archival materials, this book shows how in its afterlife, criminal evidence gives rise to new uses and interpretations, new concepts and questions, many of which are creative and transformative of crime and evidence, and some of which are transgressive, dangerous or insensitive. It takes the judicial principle of open justice – the assumption that justice must be seen to be done – and investigates instances in which we might see too much, too little or from a distorted angle. It centres upon a series of case studies, including those of Lindy Chamberlain and, more recently, Oscar Pistorius, in which criminal evidence has re-appeared outside of the criminal process. Traversing museums, libraries, galleries and other repositories, and drawing on extensive interviews with cultural practitioners and legal professionals, this book probes the legal, ethical, affective and aesthetic

implications of the cultural afterlife of evidence.

It treats subjects such as admissibility; hearsay; identification evidence; forensic and documentary evidence. It also discusses procedural issues arising from fair trial rights, state cooperation, witness protection, and the compulsive powers of the court. The main focus of this work is the practice of the United Nations ad hoc International Criminal Tribunals for the former Yugoslavia and Rwanda. However, it traces the developments of the law of evidence back to the trials conducted by the Allied powers after the Second World War. The authors also discuss the future of the law in this field, with comments on the projected implementation of the Statute and the Rules of Procedure of the permanent International Criminal Court. They conclude with some general remarks on trends in international criminal evidence that will be helpful to international tribunals, "mixed" tribunals (such as those proposed for Sierra Leone and Cambodia), and national courts alike.
