Group B Coxsackieviruses Mar
31 2021 At last - a volume that
virologists have been waiting
for: a fully updated new edition

of a major study in a key
subject area. The first edition
of this work, published in 1997,
described the molecular
biology of coxsackie B viruses,
as well as clinical,
epidemiological, and
immunological aspects of group
B coxsackievirus disease. This
brand new edition covers all
the research accomplishments
of the last ten years in this vital
area of medicine, including
immunopathology.

Training for Tomorrow Feb 10 2022

Training for Tomorrow: Educational Aspects of Computerized Automation is a collection of papers that discusses the introduction of automated systems in all sectors of industry, business, and society. The materials in the title particularly tackle the training concerns in the implementation of automated systems. The issues addressed in the text include training in administrative automation; development of operator training as an integrated part of the specification, design, and implementation of a process control system; and training for the planning of large-scale

control systems. The selection also talks about the maintenance of professionals' training course; the feasibility of success in retraining non-EDP college graduates for EDP occupations; and the future of automation. The book will be of great interest to individuals concerned with the implication of implementing automated systems in various sectors of industry, business, and society.
