Starseed Feb 10 2022 In a world illuminated by gaslight, a wealthy, debauched dandy's mentor tests the limits of conscience with a series of human-alien hybridization experiments, facilitated by the decryption of a forbidden text now known as the Voynich Manuscript. Not knowing what it is they've unleashed, mayhem ensues, with hired killers, Brazilian Wandering Spiders, and shady professionals willing to undertake the performance of any act that one should be ashamed to ask for. There is flesh, and the power that holds. Juices run, blood flows, and ichor oozes. The dandy soon comes to learn that wealth cannot buy love, the past exists for nothing so much as to haunt the present, and as long as there is desire, the Star Flower will procure what it needs to bloom, and spread its seed through the cosmos.

The Brightest Light Aug 16 2022 The Skyway Men have ruled the underworld of the skylands for centuries-- killing, stealing and doing whatever it takes of increase their wealth and power. Pistols, money and fear are their weapons of choice. After a decade exiled to a small piece of farmland that flies the quietest windlanes, Kade is thrust back into the world

of death, corruption, shady deals and dirty deeds. But it's just like old times. He doesn't know who to trust. He doesn't know who's on which side. He doesn't even know which side he's on any more. All Kade knows for sure is that murder and mayhem aren't what they used to be.

Not Just a Pretty Face Jan 17 2020 Lead in lipstick? 1,4 dioxane in baby soap? Coal tar in shampoo? How is this possible? Simple. The \$35 billion cosmetics industry is so powerful that they've kept themselves unregulated for decades. Not one cosmetic product has to be approved by the US Food and Drug Administration before hitting the market. Incredible? Consider this: The European Union has banned more than 1,100 chemicals from cosmetics. The United States has banned just 10. Only 11% of chemicals used in cosmetics in the US have been assessed for health and safety - leaving a staggering 89% with unknown or undisclosed effects. More than 70% of all personal care products may contain phthalates, which are linked to birth defects and infertility. Many baby soaps are contaminated with the cancer-causing chemical 1,4 dioxane. It's not just women who are affected by this chemists' brew. Shampoo, deodorant, face lotion and other products used daily by men, women and children contain hazardous chemicals that the industry claims are "within acceptable limits." But there's nothing acceptable about daily multiple exposures to carcinogenic chemicals -- from products that are supposed to make us feel healthy and beautiful. Not Just a Pretty Face delves deeply into the dark side of the beauty industry, and looks to hopeful solutions for a healthier future. This scathing investigation peels away less-than-lovely layers to expose an industry in dire need of an extreme makeover. 15 percent of the purchase price of each book sold benefits the national Campaign for Safe Cosmetics, administered by the Breast Cancer Fund, through December 31, 2012.

Auto Repair For Dummies May 21 2020 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a

must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

On a Global Mission: The Automobiles of General Motors International Volume 3 Dec 28 2020 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume

Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Heat Transfer and Fluid Flow in Microchannels Apr 19 2020 This first book in a new series in Thermal and Fluid Physics and Engineering, edited by Professor G.F. Hewitt, is of particular importance to the field at the present time. Edited by Professor F.P. Celata, the topic of microchannels is finding a very large range of applications, particularly in the context of cooling of electronic equipment. Fluid flow and heat transfer process at the microscale bring into play many aspects that are not significant at the macro scale. The book fills a void in the existing literature and covers a large body of new knowledge in the thermal-fluid dynamics theory and applications in micro-geometries. The volume also presents a critical assessment of the state-of-the-art in the field. Intended for both academic and industrial audiences.

American Multinationals and Japan Jan 09 2022 "This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business

Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

Just Needs a Recharge Jun 21 2020 *Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively*

expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.
