Valerie Bertinelli shares an inspiring blueprint that offers women in midlife support and hope. She shares personal stories that many women will relate to from her past decade: hitting her fifties, taking care of her dying mother, the evolving relationship with her husband, a career change, her relationship with food, and the battle to believe in herself as she is. Despite her success receiving Emmys for her Food Network show and critical praise for her books and cookbook, Bertinelli still judged herself harshly if she gained a pound or showed too many wrinkles. But after her mother died, she found an old recipe box with notes of the strong women that came before her, reminding her that she has to find out who she is and take care of herself. Saying, "enough already!" Bertinelli set out on a journey to love herself and see that perfection is not the goal; it's the joy we can find every day in our lives, our loved ones, and the food we share. Recipes and advice will be sprinkled throughout the book. Describes the management principles of Lean production that are employed by Toyota. Amazon is part of our everyday lives - and if you're not paying attention to it, you should be. We've selected our favorites for focus of this edition of Act Like X as featured in Amazon marketing materials, Bezos' shareholder letters and in books written about Bezos and Amazon including John Rossman's The Amazon Way: 14 Leadership Principles Behind the World's Most Disruptive Company, and Scott Galloway's The Four: The Hidden DNA of Amazon, Apple, Facebook, and Google. From Obsess Over Customers - the predominant rally cry at Amazon as highlighted in Bezos' first and subsequent shareholder letters - to Think Like An Owner, Day 1 Focus, and Disagree and Commit, the concepts have a common vibe - a visionary, customer-centric, entrepreneurial approach to business still permeating the

company 20-plus years after its entry into the online marketplace. Act boldly. Act with focus. Act with consistency and perseverance. Act Like Amazon. In 2011, Novak Djokovic had what has been called the greatest single season ever by a professional tennis player. He won ten titles, three Grand Slams and 43 consecutive matches. Remarkably, less than two years earlier, this champion could barely complete a tournament. How did a player once plagued by aches, breathing difficulties and injuries on court suddenly become the number-one tennis player in the world? The answer is astonishing: he changed what he ate. In *Serve to Win*, Djokovic recounts how he survived the bombing of Belgrade, rising from a war-torn childhood to the top tier of his sport. He reveals the diet that transformed his health and pushed him to the pinnacle. While Djokovic loved and craved bread, pasta and, of course, the pizza from his family's restaurant, he found his body couldn't process wheat. Eliminating gluten made him feel instantly better, clearer, lighter and quicker. His new physical health and mental focus enabled him to achieve his two childhood dreams: to win Wimbledon and to be ranked the world's number-one tennis player. Djokovic challenges you to try his way of eating for just 14 days. He provides weekly menus and easy-to-prepare recipes that will help you lose weight and find your way to a better you. You don't need to be a professional athlete to start living and feeling better. A trimmer, stronger, healthier you is just two weeks away! Throughout the course of history, there have been many inventions that have changed the ways societies function, propelling them into a new era. Computers and other corresponding technologies are relatively new inventions, but they have greatly influenced the way modern societies operate. This book gives insight into the most influential inventors of computer technology and the ways in which their inventions contributed to advancing humanity. Tells the story of how America's biggest companies began, operated, and prospered post-World War I This book takes the vantage point of people working within companies as they responded to constant change created by consumers and technology. It focuses on the entrepreneur, the firm, and the industry, by showing—from the inside—how businesses operated after 1920, while offering a good deal of Modern American social and cultural history. The case studies and contextual chapters provide an in-depth understanding of the evolution of American management over nearly 100 years. *American Business Since 1920: How It Worked* presents historical struggles with decision making and the trend towards relative decentralization through stories of extraordinarily capable entrepreneurs and the organizations they led. It covers: Henry Ford and his competitor Alfred Sloan at General Motors during the 1920s; Neil McElroy at Procter & Gamble in the 1930s; Ferdinand Eberstadt at the government's Controlled Materials Plan during World War II; David Sarnoff at RCA in the 1950s and 1960s; and Ray Kroc and his McDonald's franchises in the late twentieth century and early twenty-first; and more. It also delves into such modern success stories as Amazon.com, eBay, and Google. Provides deep analysis of some of the most successful companies of the 20th century Contains topical chapters covering titans of the 2000s Part of Wiley-Blackwell's highly praised American History Series *American Business Since 1920: How It Worked* is designed for use in both basic and advanced courses in American history, at the undergraduate and graduate levels. Best Book of Fall (Esquire) and a Most Anticipated Book of 2021 (Lit Hub) *What Has Happened to Fiction in the Age of Platform Capitalism?* Since it was first launched in 1994, Amazon has changed the world of literature. The "Everything Store" has not just transformed how we buy books; it has affected what we buy, and even what we read. In *Everything and Less*, acclaimed critic Mark McGurl explores this new world where writing is no longer categorized as high or lowbrow, literature or popular fiction. Charting a course spanning from Henry James to E. L. James, McGurl shows that contemporary writing has less to do with writing per se than with the manner of its distribution. This consumerist logic—if you like this, you might also like ...—has reorganized the fiction universe so that literary prize-winners sit alongside fantasy, romance, fan fiction, and the infinite list of hybrid genres and self-published works. This is an innovation to be cautiously celebrated. Amazon's platform is not just a retail juggernaut but an aesthetic experiment driven by an unseen algorithm rivaling in the depths of its effects any major cultural shift in history. Here all fiction is genre fiction, and the niches range from the categories of crime and science fiction to the more refined interests of Adult Baby Diaper Lover erotica. *Everything and Less* is a hilarious and insightful map of both the commanding heights and sordid depths of fiction, past and present, that opens up an arresting conversation about why it is we read and write fiction in the first place. In suspenseful prose he details his historic flight to the Moon with Alan Shepard and Stu Roosa, describing everything from the practical—eating, sleeping, and going to the bathroom in space—to the metaphysical, such as the life-changing sense of connectedness to the universe that he felt during his return to Earth. Resources include lists of websites about space, museums and organizations, films and videos, and books for further reading. Edgar Mitchell was the Lunar Module Pilot for the Apollo 14 mission and the sixth man to walk on the Moon. Meet the Smart Wife—at your service, an eclectic collection of feminized AI, robotic, and smart devices. A Japanese digital voice assistant—a virtual anime hologram named Hikari Azuma—sends her “master” helpful messages during the day; an American sexbot named Roxxy takes on other kinds of household chores. In *The Smart Wife*, Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out “wifework”—domestic responsibilities that have traditionally fallen to (human) wives. They show that the principal prototype for these virtual helpers—designed in male-dominated industries—is the 1950s housewife: white, middle class, heteronormative, and nurturing, with a spick-and-span home. It's time, they say, to give the Smart Wife a reboot. What's wrong with preferring domestic assistants with feminine personalities? We like our assistants to conform to gender stereotypes—so what? For one thing, Strengers and Kennedy remind us, the design of gendered devices re-inscribes those outdated and unfounded stereotypes. Advanced technology is taking us backwards on gender equity. Strengers and Kennedy offer a Smart Wife “manifesta,” proposing a rebooted Smart Wife that would promote a revaluing of femininity in society in all her glorious diversity.
