Michael Isenberg casts aside the traditional textbook approach and presents the study of history as a series of puzzles to ponder, with neither right nor wrong answers. Thinking about history, from this point of view, becomes an exciting intellectual adventure that has little to do with rote memorization. This stimulating, open-ended approach focuses not on quick answers but on searching questions, the building of a relationship between an individual and the past. Teaching History 11-18 is a comprehensive introduction to teaching, learning and assessing history in secondary schools. Drawing on cutting edge research and practice, it draws together recent thinking in teaching and learning in history, teaching and learning in secondary education more generally and classroom-based research to provide a radical re-thinking of the practices of teaching and learning about the past at the beginning of the twenty-first century. At the core of the book is a focus on diversity and its implications: the diversity of classrooms in English schools, cultural diversity and pluralism in accounts of the past, and the diversity of pedagogic and communicative strategies at the disposal of teachers. The book is realistic about the challenges: a precarious place in the curriculum, pupil disaffection, bitter ideological debates about the purpose, place and status of history, but offers a forward-looking rationale for the centrality of the past in debates about identity, social cohesion and

persona and social education. A Father, His Son, and an Unrelenting Quest for a Cure At the age of twenty-seven, Whitney Dafoe was forced to give up his life as a photographer who traveled the world. Bit by bit a mysterious illness stole away the pieces of his life: First, it took the strength of his legs, then his voice, and his ability to eat. Finally, even the sound of a footstep in his room became unbearable. The Puzzle Solver follows several years in which he desperately sought answers from specialist after specialist, where at one point his 6'3" frame dropped to 115 lbs. For years, he underwent endless medical tests, but doctors told him there was nothing wrong. Then, finally, a diagnosis: Chronic Fatigue Syndrome, also known as myalgic encephalomyelitis. In the 80s, when an outbreak of people immobilized by an indescribable fatigue were reported near Lake Tahoe, Nevada, doctors were at a loss to explain the symptoms. The condition would alternatively be nicknamed Raggedy Ann Syndrome or the Yuppie Disease, and there was no cure or answers about treatment. They were to remain sick. But there was one answer: Whitney's father, Ron Davis, PhD, a world-class geneticist at Stanford University whose legendary research helped crack the code of DNA, suddenly changed the course of his career in a race against time to cure his son's debilitating condition. In The Puzzle Solver, journalist Tracie White, who first wrote a viral and award-winning piece on Davis and his family in Stanford Medicine, tells his story. In gripping prose, she masterfully takes readers along on this journey with Davis to solve one of the greatest mysteries in medicine. In a piercing investigative narrative, closed doors are opened, and masked truths are exposed as Davis uncovers new proof confirming that Chronic Fatigue Syndrome is a biological disease. At the heart of this book is a moving story that goes far beyond medicine, this is a story about how the power of love -- and science -- can shine light in even the darkest, most hidden, corners of the world.
